

Make a Connection with St. Clair Cosmetic & Laser Clinic

Dr. Nino Kuzmar promises to help people feel better about themselves

Sandy Caetano

DR. NINO KUZMAR ISN'T your average doctor. He's a doctor with heart. Someone who's passionate and dedicated about the career path he's chosen to follow.

What keeps people returning to his cosmetic clinic is this doctor's need to make a difference in the lives of his patients. For everything he has accomplished so far at St. Clair Cosmetic & Laser Clinic, the people who entrust their well-being to him have shown their gratitude by ensuring he was recognized for his excellence.

The outpour of votes made it unanimous - Dr. Kuzmar and his team at St. Clair Cosmetic & Laser Clinic have been awarded the Top Choice Award for Top Cosmetic Clinic of 2011 in Toronto.

"...it's not merely about selling aesthetic services and products, it's really about helping people attain their personal goals."

— Dr. Nino Kuzmar

"It really means something to win an award such as this because it is voted for by the people, the people I treat in my clinic, the people I have made a connection with," says Dr. Kuzmar, medical director and founder of St. Clair Cosmetic & Laser Clinic. "I have been in the medical services industry for over 20 years, so it's not merely about selling aesthetic services and products, it's really about helping people attain their personal goals."

Dr. Kuzmar's top priority - providing the most effective non-surgical cosmetic treatments currently available in a welcoming, friendly environment where patients can feel comfortable and will be treated with respect and the utmost care.

For those of you who have not been to St. Clair Cosmetic & Laser Clinic, it is not a spa. It is a dedicated non-surgical cosmetic medical facility offering the latest in advanced, results-oriented facial rejuvenation, body contouring and laser hair removal for men and women of all skin types. They particularly specialize in non-surgical facial rejuvenation and facial enhancement procedures using cosmetic injectables, non-ablative, ablative and minimally invasive cosmetic laser and energy based technology. They also have extensive experience and provide the safest and most effective technologies and products for use in the darker and ethnic skin population.

Dr. Kuzmar offers his patients an unwavering commitment to the delivery of optimal results, while ensuring every step of the way the importance of patient safety. Furthermore, a highly personalized approach with patient education at the forefront is the focus at St. Clair Cosmetic & Laser Clinic. Consultations and follow-ups are a must with Dr. Kuzmar and his team of highly qualified and experienced professionals, led by Noah Kiani, a certified skincare therapist with more than 12 years of experience in the cosmetic industry.

"All of our treatment plans are very individualized, customized and personalized

**"...individualized,
customized and
personalized for
every client..."**

for every client who walks through the door," says Kiani.

When you pick up the phone and call St. Clair Cosmetic & Laser Clinic, they will not sell you a predetermined or pre-made package. They focus on getting the results you want by first assessing your needs, lifestyle, expectations and budget.

"All of those key factors help us determine what the plan should be, we chart it out for you and we're here from day one and for the entire ongoing process," continues Kiani. "Patient satisfaction is key because that's where the integrity comes in - we're very honest about what we can offer patients. We cannot perfectly predict the future but we always strive for

the safest and most effective treatment options, always preparing our patients for possible complications, and finally do our best to ensure that they are happy with the results."

Of note, Dr. Kuzmar is the first cosmetic physician in Canada and amongst a select few in North America to introduce the revolutionary new minimally invasive **ePRIME™** system, and successfully integrate it into his signature two-stage injectable "**EVOLASTIN™ MiniLift**" procedure. Offering patients not only a true non-surgical alternative to lower facelift surgery but also delivering comparatively more natural looking results.

Dr. Kuzmar is also amongst the first in the country to offer one of the most advanced skin resurfacing systems currently available in the global market. The new **CO2RE™** ablative fractional CO2 resurfacing system, which can dramatically improve acne scars, sun damage and enhance skin texture and tone in a single session.

When asked about his personal key to success in such a highly competitive business, Dr. Kuzmar simply responds, "When you love what you do, that energy fuels your drive to succeed. It allows you the ability to remain passionate, connected and enthusiastic about all elements of even the most complex of operations...it resonates throughout." 🌟
